SUMMARY

Full Stack Developer with 3+ years of experience building scalable web and mobile applications using JavaScript, TypeScript, MERN Stack, and React Native. Experienced in designing REST APIs, role-based systems, payment integrations, authentication flows, and cloud deployments. Improved API performance by 40% and Core Web Vitals by 30% through backend and frontend optimization.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS, Redux, Bootstrap

Backend: Node.js, Express.js, REST APIs, Webhooks

Databases: MongoDB, MySQL

Cloud & Tools: DigitalOcean, App Platform, CI/CD, Git, GitHub, GitLab, Postman, Firebase

Authentication & Security: JWT, OAuth, SSO, RBAC

WORK EXPERIENCE

Adze Studio — Full Stack Developer | Bangalore, India

January 2024 – Present

- Reduced API response time by 40% by optimizing middleware, query structure, and backend architecture.
- Improved Core Web Vitals (LCP, FCP, TBT) by 30% using lazy loading, code splitting, and asset optimization.
- Built scalable eCommerce systems (catalog, cart, checkout, order management) with Stripe, Razorpay, PayPal integrations.
- Implemented real-time features including delivery tracking (Google Maps API), push notifications (Firebase FCM), and OTP authentication (WhatsApp API).
- Developed cross-platform mobile features using React Native with efficient Redux state management.
- Built admin dashboard with role-based access control for user, product, and order management with real-time analytics.
- Implemented Single Sign-On (SSO), improving user experience and reducing authentication friction.
- Deployed and maintained production systems on DigitalOcean using App platform, and CI/CD pipelines, ensuring reliability and scalability.
- Configured custom domain mapping, DNS records, SSL certificates, and hosting integrations through GoDaddy and cloud platforms for secure production deployments.

Refactor Academy — MERN Stack Developer Intern | Remote

January 2023

- Built and optimized modules for SkillIQ, an online interview platform, using the MERN stack with focus on candidate workflows, assessment management, and performance tracking.

PROJECTS

AutomatedSystems – ERP for Project & Customer Management | React.js, Node.js, MongoDB, Express.js [↗ automedsystems.in](https://www.automedsystems.in)

- Built a multi-tenant ERP platform for project, customer, and workflow management with role-based access for admins and clients.
- Implemented role-based dashboards for admins and clients to monitor project milestones, tasks, and updates.
- Designed scalable REST APIs for customer onboarding, project lifecycle management, and reporting modules.

Skibboo – Kids Study & Play App | React Native, Node.js, MongoDB [↗ Play Store](https://play.google.com/store/apps/details?id=com.skibboo)

- Developed a mobile platform enabling kids to create and join study/play sessions with parental controls.
- Implemented secure authentication and collaborative features for safe social interaction.

OSI – Professional Association Website | React.js, Next.js, Node.js [↗ osindia.org](https://osindia.org)

- Built a role-based web platform for a medical association with secure membership and fellowship workflows.
- Designed scalable frontend and backend architecture for handling user roles and approvals.

EDUCATION

B.Tech in Electronics and Communication Engineering — RGUKT, Basar

2018 – 2022
